RECEIVED FROM (NAME) Doug Pommeroy

CONVERSATION

Doug works for the Environmental Group, Dept. of Navy, and is working on impacts of overflights by Marine fliers out of Yuma, AZ on Sonoran pronghorn. In a biological opinion (?) Navy has agreed to give $30,000 to FWS for studies on impacts. Doug has heard that AZG&F is upset about FWS getting $ for pronghorn. Apparently problems between FWS and AZG&F concerning pronghorn, and word is getting out to other agencies.

Also, Doug was also confused as to whether he should listen to the biol. opinion or the recovery team. I straightened him out - recovery teams make recommendations only to the RD. I will make sure the Sonoran Pronghorn Rec. Team that meets next week also understands this.
