RECORD

SUBJECT: Mexico Survey for Sonoran pronghorn

CONVERSATION

I tried to get some info on logistics.

de Vos said:
Dean Hendrickson - at Fluent in Spanish
Fernando → (caretaker for Pinacate) may have an idea of where they (pronghorn) are in Mexico
Dave Brown - also may have some idea of their distribution in Mexico (he was just down there this past Christmas & New Years)

He wants to radio collar 6-10 animals.
Estimates telemetry would cost.
$ 15,000 - 18,000

Aircraft → $ 90./hr

Notes from conversation w/ R. Remington
herds are largest in Jan. (mid-Dec to mid-Feb)
would be best time to survey in Mexico

over →

Alt: Sonoran pronghorn
