FISH & WILDLIFE SERVICE

1980

Produced by the United States Fish and Wildlife Service

Wetland classifications from 1:120 000-scale black and white aerial photographs taken 1972 and other source data

SPECIAL NOTE

This document was prepared primarily by stereoscopic analysis of high altitude aerial photographs. Wetland identification was accomplished to the extent possible as technology and expertise in accordance with Classification of Wetlands and Deep Water Habitats of the United States (An Operational Draft) Cowardin, et. al. 1977. The aerial photographs typically reflect conditions during the specific year and season when they were taken. In addition, there is a margin of error inherent in the use of the aerial photographs and in the interpretation of any remote sensing data. Thus, any subsequent revision of the wetland boundaries established on these photographs may require field investigation. In addition, some small wetlands and those obscured by dense forest cover may not be included in the document.

Federal, State and local regulatory agencies with jurisdiction over wetlands may define and delineate wetlands differently than is shown on this map and that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, State or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate Federal, State or local agencies as to the current agency regulatory programs and proprietary jurisdictions that may affect such activities.

CONVERSION TABLE

Meters	Feet
1	3.2808
2	6.5617
3	9.8425
4	13.1234
5	16.4042
6	19.6850
7	22.9659
8	26.2467
9	29.5276
10	32.8084

To convert meters to feet multiply by 3.2808

To convert feet to meters multiply by 0.3048
