Wetland classifications from 1:58,000 scale color infrared aerial photographs taken 1982 and other source data.

Projection and 10 000-meter grid, zone 12
Universal Transverse Mercator
25 000-foot grid ticks based on New Mexico coordinate system, west zone. 1927 North American datum
To place on the predicted North American Datum 1983 move the projection lines 8 meters south and 56 meters east

SPECIAL NOTE

This document was prepared primarily by stereoscopic analysis of high altitude aerial photographs. Wetlands were identified on the photographs based on vegetation, visible hydrology, and geography in accordance with **Classification of Wetlands and Deep Water Habitats of the United States** (Cowardin et al., 1979). Wetlands may appear dry on aerial photographs typically reflect conditions during the specific year and season when photos were taken. In addition, there is a margin of error inherent in the use of the aerial photographs. Thus, a detailed on the ground and historical analysis of a single site may result in a revision of the wetland boundaries established through photographic interpretation. Small wetlands may be excluded from aerial wetlands and those obscured by dense forest cover may not be included on this document.

Federal, State and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, State or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate Federal, State or local agencies concerning specific agency regulatory programs and proprietary jurisdictions that may affect such activities.

NOTES TO THE USER

- Wetlands which have been field examined are indicated on the map by an asterisk (*).
- Additions or corrections to the wetlands information displayed on this map are solicited. Please forward such information to the address indicated.
- Subsystems, Classes, Subclasses, and Water Regimes in *italics* were developed specifically for NATIONAL WETLANDS INVENTORY mapping.
- Some areas designated as R4SB, R4SBV, OR R4SBJ (INTERMITTENT STREAMS) may not meet the definition of wetland.
- This map uses the class Unconsolidated Shore (US). On earlier NWI maps that class was designated Beach/Bar (BB), or Flat (FL). Subclasses remain the same in both versions.

Other information including a narrative report concerning the wetland resources depicted on this document may be available. For information, contact:

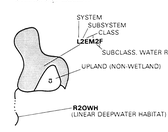
MODIFIERS

In order to more adequately describe wetland and deepwater habitats one or more of the water regime, water chemistry, soil, or special modifiers may be applied at the class or lower level in the hierarchy. The special modifier may also be applied to the ecological system.

WATER REGIME				WATER CHEMISTRY			SOIL	SPECIAL MODIFIERS	
Non-Tidal		Tidal		Coastal Halinity	Inland Salinity	pH Modifiers for all Fresh Water			
A. Temporarily Flooded	H. Permanently Flooded	K. Artificially Flooded	T. Temporary Tidal	1 Hyperhaline	7 Hyperhaline	6 Acid	1 Organic	b. Beaver	f. Farmed/ Drained/ Ditched
B. Saturated	J. Intermittently Flooded	U. Unknown	V. Seasonal Tidal	2 Euhaline	8 Euhaline	7 Circumneutral	2 Mineral	d. Partially Drained/ Ditched	h. Diked/ Impounded
C. Seasonally Flooded			W. Permanent Tidal	3 Mixohaline (Brackish)	9 Mixosaline	8 Alkaline			i. Artificial Substrate
D. Intermittently Flooded			U. Unknown	4 Polyhaline	10 Fresh				r. Excavated
E. Saturated/ Semipermanently Flooded				5 Mesohaline					
G. Intermittently Exposed				6 Oligohaline					

*These water regimes are only used in nearly intermittent freshwater systems.

SYMBOLOGY EXAMPLE



U — Primarily represents **upland** areas, but may include unclassified wetlands such as man-modified areas, non photo-identifiable areas and/or unintentional omissions.
